## Journey of NIMMI

## About NIMMI Hardware

NIMMI range of furniture and architectural hardware comes from a business house which has been engaged in this industry for more than 30 years. We use our rich experience and technical know-how to develop world class products suitable for Indian wood workers and customers alike. We consistently strive to develop aesthetically appealing and robust products which are suited to last a lifetime.

As a team we have a strong focus on customer feedback and after sales support. With a dedicated customer care line and a beeline of product experts we do our best to provide the best solutions to our partners.

# About Us

Handles Pull handles Wall hooks Door stoppers | Journal

HISTORY DESIGNERS QUALITY

## We believe in good design

We work with internationally renowned designers to create cutting-edge decorative accessories. With the help of their aesthetic sensitivity, we develop products that are as functional as they are extraordinary.

HISTORY DESIGNERS QUALITY

## From fashion to decoration

We started out in 1932 making buttons. In 2009, we reinvented ourselves as designers of decorative accessories. In the course of this long history, we have become experts in creating small-format design accessories.

# Product Overview

The screenshot shows the Blum website's product page for the TANDEMBOX antaro. At the top, there's a navigation bar with links for Products, Services, Company, and Contact Blum. Below the navigation is a search bar with a magnifying glass icon and the word "Search". The main content area features a large image of a kitchen cabinet with a pull-out tray. To the right of the image is a detailed description of the TANDEMBOX antaro application, mentioning its feather-light glide and low-friction cylindrical nylon rollers designed to withstand load bearing classes of 30 and 65 kg.

The screenshot shows the Titus+ website's product page for the Tekform Slimline Tacto. The top navigation includes links for Titus Group, Titus Cabinet Hardware, Titus Damping, Titus Technologies, News, Titus Expertise, Contacts, Events, and a "Select country: International" dropdown. The main content area features a large image of an open drawer. To the left is a text block about the "One-for-All" principle, stating that one item provides a push-open feature for many different drawer sizes. The Tacto mechanism is described as follows the "One-for-All" principle.

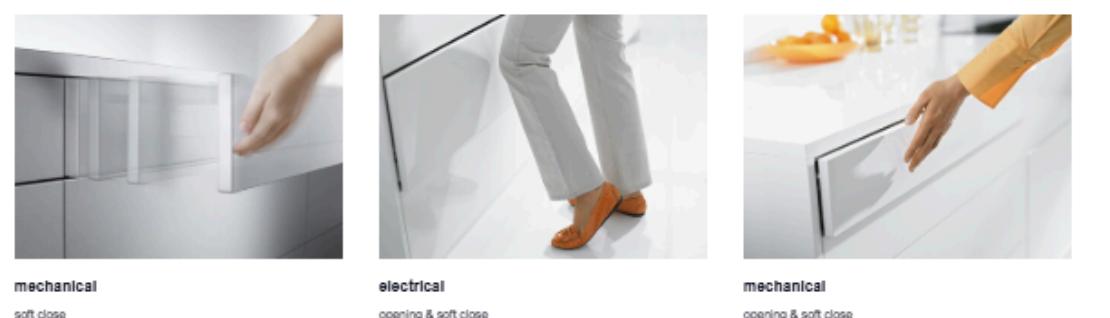

## Narrow 1.5mm operating gap for evenly aligned fronts

Sensitivity of the system allows only 1.5 mm gap which enables perfectly aligned fronts and assures confident opening and closing. Intuitive adjustment allows precise and uniform gap layout that goes well with other Titus' touch opening solutions.

The screenshot shows the Blum website's product page for the TANDEMBOX antaro. The top navigation and search bar are identical to the previous screenshot. The main content area features a large image of a modern kitchen with various cabinet doors open, showcasing the TANDEMBOX antaro system. A legend on the right side lists three types of motion technologies: BLUMOTION by Blum, SERVO-DRIVE by Blum, and TIP-ON.

The screenshot shows the Blum website's product page for the TANDEMBOX antaro. The top navigation and search bar are identical to the previous screenshots. The main content area features a large image of a hand assembling a component. To the right is a text block about assembly, stating that we want you to be able to assemble our products quickly and simply, for example with our tried and tested INSERTA technology for tool-free assembly.

The screenshot shows the Blum website's product page for the TANDEMBOX antaro. The top navigation and search bar are identical to the previous screenshots. The main content area features a large image of a hand opening a drawer. To the right is a text block about opening and closing ease, stating that motion technologies by Blum ensure enhanced ease of use day in, day out. Be it mechanical or electrical – drawers and pull-outs equipped with Blum motion support systems seem to open and close by themselves.

The screenshot shows the Blum website's product page for the TANDEMBOX antaro. The top navigation and search bar are identical to the previous screenshots. The main content area features a large image of a hand opening a drawer. To the right is a text block about easy opening and reliable closing, stating that the system is optimized to assure reliable and secure opening and closing throughout the product lifetime with minimum drawer bounce back on closing. The spring force in the mechanism is tuned with the damping force of the drawer rail to provide the best opening/closing experience. Due

The screenshot shows a product catalog page for Kesseböhmer. At the top right, there is a "Help" button and a toolbar with various icons. The main content area features a large image of a kitchen cabinet door with a handle and a smaller image of a red chili pepper on a tray. Below these images, the text "FROM CLASSIC TO CONTEMPORARY" and "OUR VERSATILE TRAY VARIANTS" is displayed, along with the Kesseböhmer logo.

**FROM CLASSIC TO CONTEMPORARY**  
OUR VERSATILE TRAY VARIANTS  
KESSEBÖHMER

PEOPLE CHOOSING A NEW KITCHEN SET A HIGH PRIORITY ON ATTRACTIVE DESIGN - ALSO FOR THE INTERIOR FITTINGS - AS AN IMPORTANT PURCHASE CRITERION. This means that function and optics should blend in a homogenous whole, the interior fittings must harmonize with the overall kitchen design.

Our design variants ARENA classic, ARENA style and ARENA pure, metal trays/baskets are used in all our ladder pull-outs, and in corner and base units. All ARENA variants combine optimal functionality and attractive design with maximum space utilization - thanks to the railing being attached to the outer edge of the tray.

**VONSILD**  
BY FURNIPART

**VONSILD by furnipart**

VONSILD is more than just handles for your furnitures; it is a tribute to nature. The beauty of real wood, craftsmanship, and the love for details are united in VONSILD. We welcome you to a world of handles that are practical, authentic, and natural to the touch. We embrace the inherent character of wood with all its complex patterns, unique grain structures, and subtle characters - it is precisely these qualities that make each piece of VONSILD unique.

## DUONA

Meaning "bridge", Duona draws inspiration from the iconic 70s era. The D-handle has a surface machining - a prominent protrusion in the middle - giving the handle a slimmer profile and adds character to its design. Duona is like a time machine that brings the vintage style and industrial rawness of the 70s back to life.
